

YOUR PARTNER FOR CHALLENGING PROJECTS IN MEDICAL TECHNOLOGY

NOVOPLAST
Präzision in Kunststoff

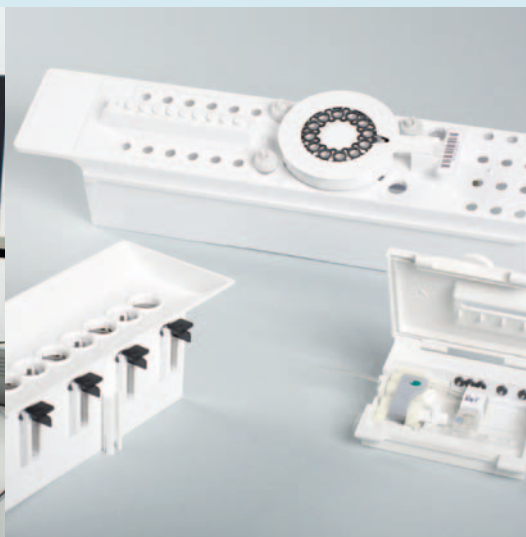

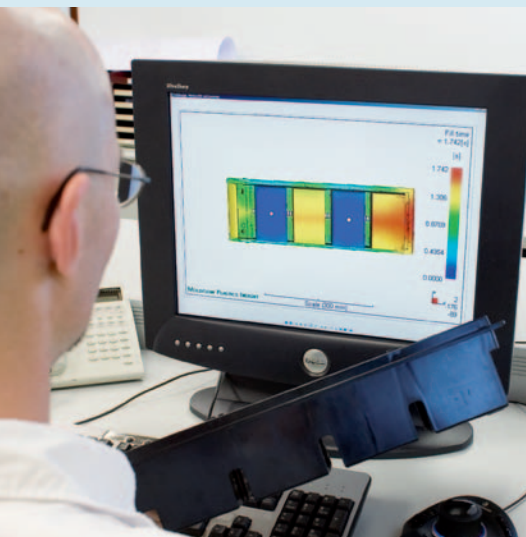

OUR COMMITMENT...

... TO PERFECTION

in plastics processing

Health is a central need of us humans, and is an area in which compromise is out of the question.

Equally high are the demands placed on products, devices and components in medical technology. Thanks to our comprehensive know-how in the medical sector, we at NOVOPLAST AG are in a position to meet the highest possible demands.

... TO INNOVATION

as your engineering partner for plastics solutions

With its long-standing experience in the area of medical technology, our team of specialists will support you creatively and conscientiously in the development and implementation of your products, naturally using state-of-the-art tools such as process simulation and FEM analysis and rapid prototyping processes. Product specifications, together with the related regulatory requirements, will be recorded in a functional specification and the project targets agreed together with you. Following a risk analysis, our project management ensures that implementation runs according to schedule, right up to performance qualification (PQ).

... TO FLEXIBILITY

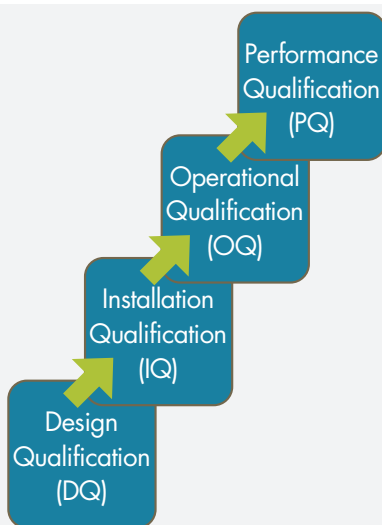

thanks to complete process capability

High reproducibility in manufacturing processes is vital to achieving the best possible quality.

ISO 9001/2008 and ISO EN 13485/2003 certification for medical devices serves as our guidelines in the definition of our manufacturing and validation processes.

In the area of medical devices we offer you validation of the entire process chain, from design qualification (DQ) to performance qualification (PQ) in accordance with ISO EN 13485.

We work together with you to define component-specific validation processes, and integrate them into the overall procedure.

... TO TRUST

in our partnership with you

The entire NOVOPLAST team is highly motivated to perform at their absolute best day in, day out. Maintaining a relationship with you that is based on partnership is the focal point of everything we do – being able to understand and approach one another are vital to success.

We're here to hear about your visionary ideas for the medical devices of tomorrow, and look forward to taking them on as our next challenge. Our expertise is reflected in your products.

... TO FLEXIBILITY

as a highly committed partner

New materials and processes allow for new applications and substitutions, which is why we constantly set ourselves innovative challenges within our manufacturing technologies with a view to offering our customers new solution approaches.

Our range of services extends well beyond the manufacture of high-quality components and system solutions, and also includes the sterilization or sterile packaging of products.

Thanks to a logistics concept that is tailored to suit your needs, we can ensure problem-free delivery capacity.

WE PRODUCE IN SWITZERLAND FOR YOU
